

Braunmetall

Metal **shaped for the future.**

Service and Metal Trading

Braun Metall Vertriebs GmbH was founded in 1992 and is your reliable service and trading partner for various non-ferrous metals and more.

We focus on **sheets, strips** and **foils** made of:

- Aluminum
- Bras
- Zinc
- Nickel Silver
- Bronze
- Copper
- Stainless steel

Metal and Foil Processing

Braun GmbH Folien-Prägetechnik was founded in 1998 and originates from Braun Metall Vertriebs GmbH. The core competence of the company is metal foil processing.

Our **processing options** for you are:

- Embossing
- Molding
- Cross-cutting
- Cutting lengthwise
- Punching
- Cutting
- Microperforating

Foil and powder coating

In addition to the processing possibilities of Braun GmbH Folien-Prägetechnik, we offer the possibility to equip the metal foils with heat-sealable powder or film adhesives. This makes the metal foils sealable for a wide variety of applications. In addition to **metal foils, nonwovens, cardboard** and **paper**, as well as other materials available in rolls, can also be finished. With our coating technology we are also able to build up multilayer laminates (e.g. aluminum-fleece).
